Acknowledgement

This thesis would not have been possible without contributions of many people.

I would like to express my gratefulness to my supervisor Professor Bauke W. Dijkstra for bringing me to Grenoble, France. Thank you for your continuous support of my Ph.D study, for your patience, motivation and immense knowledge. Your guidance helped me in all the time of research. I could not have imagined having a better advisor and mentor like you. You have been both a great mentor of my science career and a good friend of my life. Your love for life and family, selflessness for friends and enthusiasm for science inspired me a lot.

Many thanks to my co-supervisor Professor Harry J. Wichers who supported and inspired me during our many discussions in Groningen and Grenoble. Thank you for giving critical comments and suggestions for our manuscripts, and thank you for your consistent support when things were not working especially in the first year of my Ph.D study.

I would like to thank my lab manager and co-supervisor Dr. Montserrat Soler-Lopez for your immense support in my daily research, and for co-supervising me in the last two years. Thank you for your great support for the thesis writing and correction, and taking time to draw the nice and artistic figures in this thesis.

I would like to thank my thesis assessment committee members Professor Annette Rempel, Professor Dirk J. Slotboom and Professor Willem J. H. van Berkel for taking your precious time to read my thesis.

Many thanks to my friend Paul. Thank you for the nice meals in Groningen. You made my every visit to Groningen like coming back home. I will certainly miss those times when we spent together with Bauke in restaurants, your Groningen home and my Grenoble apartment.

Special thanks to my former lab manager and now collaborator Dr. Chloe Zubieta for the discussions and hands-on experiments in the first year. You have helped and taught me a lot. I would like to thank Dr. Philip A. Wigge for allowing me to work as a postdoc in your lab before my thesis defense.

Many thanks to now and then Ph.D students and postdocs at the ESRF structural biology group: Sriharsha Puranik, Sylvain Aumonier, Filippo Romoli, Michael Lerch, Romain Bouverot, Benedicte Lafumat, Igor Melnikov, Cristiano De Sousa Mota, Martha Brennich, Barbara Calisto Machado, Susana Goncalves Pires, Ulrich Zander, Bart van Laer, Gabriele Giachin, Gianluca Santoni, and Guillaume Gotthard. You have made my three and half years in the lab pleasant and unforgettable.

I would like to acknowledge beamline scientists, Gordon Leonard, Christoph Mueller-Dieckmann, Sasha Popov, Max Nanao, Daniele de Sanctis, and David Flot for your assistance during data collection at the ESRF. Especially, I would like to acknowledge EMBL beamline scientist Matthew Bowler and his automatic beamline MASSIF-1, for screening hundreds of crystals for me in the last stage of my thesis when there was not much time left. Thank you Matthew for carrying back and forth the heavy crystal dewar between CIBB and MASSIF-1.

Many thanks to Groningen crystallography group PhD students Jinfeng, Marco and Ilona for your company when I visited Groningen, and for your great help with the thesis ceremony.

Thank you Samira and Ulrike for your great job in the daily maintenance of the lab, and especially for your patience in dealing with my endless orders (genes, enzymes, medium, Sigma chemicals etc.). I would like to thank biophysics facility managers of the partnership of structural biology (PSB) for your great assistance during my research. Particularly, Frederic Garzoni for your help with the insect cell expression.

I would like to thank ESRF administration team (HRs, travel office administrators et al.) for your support during my stay at the ESRF. Your efficient work had made my life much easier in France.

Many thanks to my Chinese friends in Grenoble: Li Sun, Yan Zeng, Qiyang Jiang, Yan Nie, Peixiang Ma, Xiaokang Zhang, Kuan-ming Chen, Yan Li, Lijing Jin, Zhaolin Yang, Rong Chen, Ya-ping Ko, Yarong Hou. Parties with you during Chinese festivals relieved my homesickness, and made my stay in France like home.

I am grateful for my friends at the Saint Mark's church: Pastor Bob Hurley, Howard, Matthew, Dona, Selina, Elizabeth, Alan, Nell, John, Rich, Penny, Jim, Jean-Philippe, Frank, and many others that I don't know name. Thank you for your prayers both for my family and my study.

Special thanks to my family. Words cannot express how grateful I am to my dear father Baosheng Lai and mother Lanxiu Zheng. Thank you for your unconditional love and support in my whole lifetime. Thank you so much my dear sisters Yanhua Lai and Yanmei Lai for taking care of our parents when I am far away from them. I would like express my great appreciation to my beloved wife Xiaodan Zeng and son Tianmu Lai for joy, peace and love. It is you that gave me motivation and great support during the hard times. I love you so much!

Finally, thank you the Great I AM (Exodus 3:14) for giving me the way, the truth and the life (John 14:6)!

Xuelel in Grenoble
